

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

HAN-GINS Cloud Technology UCITS ETF – Accumulating (the “Fund”)

ISIN: IE00BDDRF924

A sub-fund of HANetf ICAV. Managed by Carne Global Fund Managers (Ireland) Limited

Objectives and Investment Policy

The Fund seeks to track the price and yield performance, before fees and expenses, of the Solactive Cloud Technology Index (the “Index”).

Index: The Index is governed by a published, rules-based methodology and is designed to measure the performance of an investable universe of publicly-traded global companies active or expected to be active in the field of cloud computing, such as service providers or producers of equipment or software focused on cloud computing. Cloud computing refers to the delivery of computing services such as software, databases and networking, over the internet rather than on hard drives or personal devices, allowing users to access software and applications remotely.

Eligibility: To be eligible for inclusion in the Index, companies shall:

- have significant exposure to cloud computing related business activities; and
- meet the minimum market capitalisation and liquidity requirements.

The Index is rebalanced semi-annually in January and July.

Replication: Fund will employ a “passive management” (or indexing) investment approach and will seek to employ a replication or representative sampling methodology, meaning insofar possible and practicable, it will invest in all of the securities comprising the Index.

Dealing: Shares of the Fund (“Shares”) are listed on one or more stock exchanges. Typically, only authorised participants (i.e. brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income received by the Fund’s investments will not be distributed in respect of the Shares of this class. Instead will be accumulated and reinvested on behalf of the shareholders of the Fund.

Recommendation: This Fund may not be appropriate for short-term investment.

Currency: The base currency of the Fund is US Dollar.

For full investment objectives and policy details, please refer to the supplement to the prospectus for the Fund (the “Supplement”).

Risk and Reward Profile

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (6) is due to the nature of the Fund’s investments and risk associated with those investments, including:

- The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **Investment risk:** Investment risk may be concentrated in specific sectors, countries, currencies or companies. This means the Fund may be more sensitive to any localised economic, market, political or regulatory events.

- **Emerging market risk:** This Fund may invest in companies or securities markets in emerging market countries which may be riskier than investing in more developed countries.
- **Sectoral Risk:** information technology companies and internet companies are subject to specific risks such as rapid technological changes and short product lifespans.
- **Currency risk:** The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund.
- Risks not covered by the indicator, but which are materially relevant to the Fund include:
- **Tracking error risk:** The Fund’s performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund’s portfolio and other Fund expenses.
- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.
- It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the Fund buys or sells securities may compare adversely to the price under normal market conditions.

- **Counterparty risk:** The Fund is subject to the risk that third parties with which the Fund may transact may go bankrupt or fail to pay money due to the Fund or return property belonging to the Fund.
- For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
